Catastrophe!

This type of catastrophe can always be avoided by proper tethering utilizing the ground stakes provided and by having Trained Operator(s) on duty and avoiding inclement weather such as high winds i.e. winds in excess of 15 m.p.h.

Procedures for evacuation!

Each blower tube has an automatic air flap that reduces the loss of air if the blower system goes off, however, all participants should be directed off the inflatable as shown by the arrow(s) below. In the event of a power outage or in an emergency take down, the participants should be directed to exit the slide and bouncer ASAP!
